

DealsEg DotNet

MVC , .NET, Telegram Api , and Selenium

This tool is built using **ASP.NET MVC** and **Selenium**.

Features:

1. The user inputs the product ID.
2. The tool opens Chrome, takes a screenshot of the product page, highlighting the **seller** and the **price**.
3. It adds the **logo** of the page to the screenshot.
4. The tool then sends the screenshot to **Telegram**, along with the product link and information about the cashback page.
5. For every purchase made through the provided link, you earn a commission.
